DETAILED ACTION

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 51-53, 60-61, 64-65, 69-70, 76-77, 79-83, 90-91, 94-95, 99-100, 106-107 and 109-110 are rejected under 35 U.S.C. 102(a) as being anticipated by Berg et al. (5,464,650). Berg et al. discloses a vascular stent having at least a portion which is implantable into the body of a patient, wherein at least a part of the stent portion is stainless steel (col. 3, lines 37-41) covered with a coating for release of a biologically active material, wherein said coating adheringly conforms to the stent structure and comprises an undercoat comprising an ethylene vinyl acetate copolymer material incorporating an amount of biologically active material therein for timed release therefrom which acts to inhibit smooth muscle cells in said patient (col. 4, line 35- col. 5, line 39), and wherein said coating further comprises a topcoat which at least partially covers the undercoat, said topcoat comprising a biostable, non-thrombogenic polymeric

Application/Control Number: 10/603,115

Art Unit: 3738

material which provides long term non-thrombogenicity to the stent portion during and after release of the biologically active material, and wherein said topcoat is substantially free of an elutable material, i.e. ethylene vinyl acetate copolymer. Therapeutic substances, i.e. hirudin, are well known to one of ordinary skill in the art to inherently inhibit smooth muscle cell proliferation (i.e. Vlasuk et al. 5,492,895, col. 5, lines 36-59). Berg et al. discloses that the coating can comprise several layers, therefore having an undercoat and a top coat.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 54-59, 62-63, 66-68, 71-75, 78, 84-89, 92-93, 96-98, 101-105 and 108 are rejected under 35 U.S.C. 103(a) as being unpatentable over Berg et al. (5,464,650) in view of Mitchell et al. (5,288,711). Berg et al. discloses a coated vascular stent as above however Berg et al. fails to disclose the coating comprising an antibiotic. Mitchell et al. teaches a stent comprising an antibiotic (Rapamycin) to inhibit proliferation of vascular smooth muscle cells (col. 3, lines 7-31). It would have been obvious to one of ordinary skill in the art to combine the teaching of a stent comprising an antibiotic, as taught by Mitchell et al., to a coated vascular stent as per Berg et al., in order to inhibit proliferation of vascular smooth muscle cells.

Application/Control Number: 10/603,115

Art Unit: 3738

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas C. Barrett whose telephone number is (703) 308-8295. The examiner can normally be reached Tuesday-Friday between 9:00 A.M. and 6:00 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine McDermott can be reached on (703) 308-2111. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9306 for regular communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0858.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
